Competence Description

Competence	Java
Level	1 of 5 - Beginner

Summary

Understands basic Java syntax and can write small, single-class programs with guidance. Relies on documentation and examples; needs review for most code.

Knowledge

- Primitive types, String, arrays, and type casting
- Control flow: if/else, switch, for/while loops
- Methods, parameters, and return values
- Classes and objects: fields, constructors, basic encapsulation
- Basic use of ArrayList and HashMap
- Reading compiler errors and simple stack traces

Skills (can do)

- Write and run a console program from scratch
- Use an IDE to compile, run, and do basic debugging
- Implement simple algorithms (sum, search, sort small lists)
- Handle basic exceptions with try/catch

Indicators for assessment

- Can explain the difference between a class and an object
- Can fix common compile errors independently
- Solves small exercises with guidance
